

Enhancing Productivity and Efficiency for Manufacturing

DTR550™/DTR650™

Digital On-Site Two-Way Radios and Accessories

Do you speak digital?

The Next Generation DTR550™ and DTR650™ Digital On-Site Two-Way Radios

Many manufacturers have discovered the benefits of two-way radios from Motorola for effective, affordable on-site employee and subcontractor communications. Now Motorola has introduced digital technology to on-site two-way radios making them an even better solution for manufacturing and warehouse facilities.

Success in industry depends on two things...efficiency and responsiveness. Clear communication, often in noisy environments, is essential to avoid downtime—and to enable the fastest response to production problems or injuries. The DTR Series™ delivers. Its rugged construction stands up to industrial environments and the demands of overtime and multi-shift operations.

Thanks to digital technology, DTR Series radios give you the ability to call specific groups of employees—or even a single worker. You also get coverage extended by 40%, and up to 45% longer operation on a single charge.* Remarkably, you'll have all that productivity-enhancing capability—and more—in the DTR550 and DTR650. You get many other benefits, too, including digital audio quality—which stays loud and clear everywhere you have coverage. And best of all, this pacesetting performance is yours without monthly fees or annual contracts—and at a very affordable price.

RECOMMENDED FOR:

Plant manager or director, managers, supervisors, superintendents, foremen, engineers, secretaries, mechanics, laborers, technicians, shipping and receiving, assemblers, stockmen, maintenance or janitorial crews and more.

* Coverage will vary based on terrain and conditions. All comparison claims made against Motorola CP100/XU2600 analog radio models. High capacity battery and accessory antenna used.

The Digital Difference

Why Motorola Digital On-Site Two-Way Radios Are Right For Manufacturing

DIGITAL ONE-TO-ONE CALLING

Enhanced coverage, battery life, and audio quality aren't the only advantages of our new digital on-site two-way radios. No license is required to operate our 900 MHz units. And for enhanced security, we added Frequency Hopping Spread Spectrum (FHSS) with 50 non-overlapping groups. Unlike analog radios, multiple group communications can occur simultaneously on the same channel.

In addition to these overall benefits, you'll be able to take advantage of many leading-edge operational features that were never available previously. And you'll soon wonder how you managed without them.

DIGITAL ONE-TO-ONE CALLING

Allows you to call and talk privately with a specific user's radio. A private-call recipient can receive an alert—either an audible or vibrating signal. And the recipient's unit displays the caller's ID.

DIGITAL ONE-TO-MANY CALLING

Private Group Call

DIGITAL ONE-TO-MANY CALLING

- Public group call—all other DTR Series™ radios on the same group ID and channel hear communications, similar to analog radio operation.

- Private group call—enables you to program DTR Series radios to communicate with specific sets of group members. Caller ID displays group identification.

Individual unit identification also enables:

- Call forwarding to other radio IDs—notify others that you're unavailable and allow them to speak with another contact for assistance.
- Transmit ID—receiving radios will display the radio ID of the transmitting unit.

The DTR550™ and DTR650™ also feature:

- Short message service (SMS) text messaging—with ten preset messages (five on DTR550) and support for keyed-in custom messages to meet more specific needs.
- Scroll list—displays frequently used group and private IDs for easiest access.

It all adds up to a superb combination of features for your convenience, management, and productivity, all at an extraordinary value.

DTR550 and
DTR650 Radios

Excellence in Design; Exceptional Durability

Rugged and reliable, the DTR550 and DTR650 digital on-site radios undergo rigorous testing in the design process using U.S. Military 810 C,D,E and F Standards—so you can rest assured they will hold up under demanding conditions.

Motorola—A Name You Know and Trust

For more than 75 years, Motorola has been a leader in creating state-of-the-art wireless communications for people like you. The DTR550 and DTR650 digital on-site two-way radios uphold that superior standard. And each radio (and radio accessory) is backed by a limited one-year warranty. So when you select the DTR550 or DTR650 radio, you'll experience the same exceptional quality you've come to expect from all Motorola products.

Standard Package Includes:

- One DTR Series™ Digital On-Site Two-Way Radio
- Swivel Belt Holster
- Charger
- Drop-in Charging Tray
- Lithium Ion Battery
- 1/4 Wave Stubby Antenna
- Quick Reference Guide
- User's Guide CD-Rom

DTR550™/DTR650™ Accessories further enhance the productivity benefits from Motorola DTR Series digital on-site two-way radios with these convenient, time-saving accessories.

53865

53964

Headset with Swivel Boom Microphone - 53865

Ideal for noisy work areas or to avoid disturbing those around you.

Convenient way to speak and listen without having to remove radio from its holster.

High Capacity Lithium Ion Battery - 53964

High capacity rechargeable battery provides up to 19 hours of battery life per full charge.

53968

Cloning Cable - 53968

Provides time-saving cloning capability of all programming and user menu settings at the touch of a button.

53960

Multi-Unit Charger - 53960

Allows drop-in charging for up to six radios and/or batteries from a single outlet in three hours.

This wall mountable unit also provides a central storage location for radios at the end of a workshift.

NTN2074PA

Mini Keyboard - NTN2074PA

Access options, update contacts and enter commands on your radio keyboard. Also enables quick and easy text messaging. (Radio not included).

53862

Remote Speaker Microphone - 53862

Convenient way to speak and listen without having to reach for your Motorola two-way radio.

Clips on shirt or collar.
