

RASSBACH COMMUNICATIONS

LASER MARKING

Rassbach Communications can now laser mark your portables, pagers, mobiles, and more. Laser marking is a process that uses light energy to change the color of the surface. Laser marking discolors the material leaving little or no tactile feel in the surface. It is a permanent marking that can be done on virtually any material and will not damage heat treated or plated parts. We can laser mark anything on the product's including; logo's, names, phone numbers, numbering identification, and more. When your order is placed we will provide you with a design proof and you choose the placement of the laser marking. Call us today to see how we can help you with your laser marking needs!
